

UNIVERSITY OF ZAGREB SCHOOL OF MEDICINE

Plan of the course

Fundamentals of Medical Skills 2

Academic year **2016/2017**

izv. prof. dr. sc. Vesna Degoricija

I. COURSE AIMS

Early student-medical environment (hospital/outpatient clinic) contact through meetings with moderator (physician) of the group on the medical wards and clinical skills labs. The course runs through all six years of the school. Course aims are achieved through lectures, seminars and practicals divided into two groups: Practical and clinical skills and Communication skills (to give the students the overview of communication skills in medicine; to familiarize the students with the basics of the communication process; to give the students the necessary knowledge about principles of communication skills in healthcare settings; and to prepare the students to incorporate new course information into their practice). At the end of each year there is an OSCE stations exam.

By the end of the course students will be able to apply the knowledge and skills required to provide immediate aid, to recognize clinical emergency problems and their severity by focused history taking, developing differential diagnosis, and establishing treatment plans. They will develop competency in both procedural and resuscitative skills.
