

UNIVERSITY OF ZAGREB SCHOOL OF MEDICINE

Plan of the course

Pediatrics

Academic year **2016/2017**

izv. prof. dr. sc. Jurica Vuković

I. COURSE AIMS

Acquisition of basic knowledge of growth and development (physical, physiologic and psychosocial) and of its clinical application from birth through adolescence.

Development of communication skills that will facilitate the clinical interaction with children, adolescents and their families and thus ensure that complete and accurate data are obtained. Development of competency in the physical examination of infants, children and adolescents. Acquisition of the knowledge necessary for the diagnosis and initial management of common acute and chronic illnesses.

Development of clinical problem-solving skills.

An understanding of the influence of family, community and society on the child in health and disease.

The Clinical Performance Objectives are:

Inpatients:

Applies clinical knowledge in conducting a thorough history and physical examination of patients and is able to focus appropriately in the ambulatory setting.

Uses appropriate clinical decision-making skills to generate appropriate list of differential diagnoses and rationale for each.

Proposes appropriate diagnostic evaluations (laboratory tests and other procedures) based on differential diagnoses.

Generates and prioritizes list of management issues based on completed assessment of patients. Provides appropriate and effective patient education in the prevention and treatment of commonly encountered health problems.

Presents cases clearly, concisely, and comprehensively, in the proper sequence.

Documents patient encounters appropriately in a problem-oriented medical record format. Demonstrates enthusiasm, interest and self-motivation; pursues self-directed learning

Development of strategies for health promotion as well as disease and injury prevention. Development of the attitudes and professional behaviors appropriate for clinical practice.

Objectives are met by individual study, patient care and didactic teaching.

Exhibits responsibility, integrity, and caring in establishing trusting relationships with patients, family members, and health professionals.

The student participate in the inpatient experiences with patient care responsibilities similar to the first year pediatric resident. The student will provide care to hospitalized pediatric patients under careful supervision of faculty and senior house staff.

The student will participate in the initial care of acute and chronic pediatric patient admitted to different divisions of pediatric department. Patient will be new and follow up patients.

Student will have opportunity to integrate classroom physiology and clinical practice

Outpatients:

The student will deal with specific diagnostic and therapeutic interventions in the outpatient care as well as with identification, prevention and treatment of complications of the disease entities Conducts a focused history of the reason for visit (i.e., chief complaint or routine follow-up).

Initiates an appropriately focused physical examination, with attention to presenting signs and symptoms.

Develops an accurate differential diagnosis of the presenting problem, taking into account data from the history, physical examination, and available laboratory data.

Outlines appropriate treatment plan, including primary and secondary prevention measures. Instructs patient on presenting illness and self-care, taking into account pertinent social, cultural, and economic issues.

Makes/recommends appropriate referrals to other health professionals

Presents cases clearly, concisely, and comprehensively, in the proper sequence.

Documents patient encounters appropriately in a problem-oriented medical record format.

Exhibits responsibility, integrity, and caring in establishing trusting relationships with patients, family members, and health professionals.

The student will be capable of systematically analysing and discussing complex, moral issues respecting the points of view of the various parties concerned (patient, other care providers and society).

IV. EXAMINATIONS

Students are allowed to miss up to 20% of lectures (10 school hours) and 20% of seminars (6 times) without justification. Practical classes cannot be missed. If a student misses more than 20% of theoretical classes he/she needs to make up for those that are above 20% by doing a colloquium with an assigned teacher.

After the student fulfils his/hers obligations during the course of pediatrics and confirms it by attendance signature in his/hers indeks, the student can proceed to written examination (set of questions with multiple choice answers, covering whole spectrum of pediatrics). Student has to achieve at least 55% of correct answers to pass. Only after passing the written examination can student proceed to the final part of the exam.

Final exam begins with an interview with a patient, and his parents. History taking and performing physical exam of the patient, bedside interpretation and evaluation of clinical and laboratory data is of outmost importance for the assessment of student's clinical performance. Final, oral part of the examination, proves that student has or hasn't attained set goals.

1st exam term: January 20th, 2017

2nd exam term: February 17th, 2017

3rd exam term: April 7th, 2017

4th exam term: June 9th, 2017

5th exam term: September 8th, 2017
